FINAL PAPER SUBMISSION DEADLINE

The 2025 IEEE International Workshop on Metrology for Automotive (IEEE MetroAutomotive 2025) aims to be a solid reference of the technical community to present and discuss the most recent advances and results of both scientific and technological research activities in the automotive industry, with particular emphasis on new trends and applications.

Attention is paid, but not limited, to new technologies for metrology-assisted production in automotive industry, sensors/diagnostics and associated signal conditioning for automotive, and calibration methods for electronic test and measurement for automotive.

The program is designed to raise the interest of a wide group of researchers, operators and decision-makers from metrology and automotive fields, by presenting the most innovative solutions from the scientific and technological points of view. The Workshop covers all aspects of the segment, with a particular focus on hybrid/full-electrical vehicles, connected autonomous cars and related mobility.

EVENTS & OPPORTUNITIES

In addition to regular papers, many initiatives and opportunities such as special sessions, exhibits, tutorials, demos, student contests, journal papers, and others are planned to enhance your experience with the conference, and will make IEEE MetroAutomotive 2025 a vibrant event to meet with people in instrumentation and measurement for automotive. Papers that are accepted and presented will be submitted for inclusion in the IEEE Xplore Digital Library.

SPECIAL SESSIONS

The MetroAutomotive 2025 Organizing Committee invites proposals for Special Sessions on new or emerging topics in metrology for automotive that have the potential to have a major impact on the field in the near future.

The goal of these special sessions is to provide a forum for focused discussions on new topics or innovative applications of established approaches.
